From the desk of Chairman

Foot is terminal portion of our body that bears weight, allows movement and an indicator of human health. The posture erectness is the key to prevent our metatarsal, heel, ankle & knee pains, spinal problems and eventually complete health. A connective tissue layer beneath our feet is the major cushioning zone that allows us to stand, walk, jump and to be mobile in our whole life. Just imagine a foot without such cushioning; it is like standing on pin-pointed nails.

We are actively involved in development of various technologies that can aid foot care. With the existing strength of numerous health care products (under the brand name Medigel*); we are now launching Medigel* Arch care developed from Italian C3I Organogel Technology for providing artificial cushioning designed for your feet. It includes *Lifestyle*, *Sports*, *Diabetics and Heel Care Socks*.

We assure optimum cushioning beneath your feet with significant elastic rebounding impact allowing complete care of your feet.

Let's put a best foot forward by adding Miracle to your life!
